

Faction canvas size

181mm x 270mm

Each page must be provided at this full size - including the bleed area - even if all the artwork remains inside the trim area.

Canvas size - 181 x 270mm

This is the size the entire document should be - including the bleed (5mm of bleed all sides).

Trim Area - 171 x 260mm

This is the size the page will be after the bleed has been trimmed away by the printers.

Safe Area - 159 x 248mm

This blue area is the safe area in the comic page. All relevant text, captions, and balloons should be contained in this area to avoid any danger of being trimmed away.

If your page does not bleed off - ie, it has the traditional comics page look, with a border on all four sides - then all artwork - panels, word balloons and text should be confined to this blue area.

Please don't include page numbers on your artwork!

Preferred RGB format: Adobe RGB (1998)

File format

Please provide pages as separate TIFF files with LZW compression.

Files should be flattened and in RGB format. (BW comics can be in greyscale).

Files must be at least 300 dpi.

Name each file according to page order - 001.tif, 002.tif, 003.tif etc.
